The screenshot shows the IntelliJ IDEA interface with two tabs visible: 'Project View' and 'Classes'.

**Project View:** This tab shows the file structure of the project. The root directory is 'urlEditor', which contains the following files:

- browserIcon
- urlEditor
- urlField
- urlLabel
- url
- urlEditLock

**Classes:** This tab shows the class hierarchy for the 'urlEditor' class. The hierarchy is as follows:

- urlEditor (ElementHolderScene<? extends ElementHolder>, Observable<String>)
  - addNodesToGrid()
  - createNodes()
  - createScene()
  - createUrlField()
  - createUrlIcon()
  - createUrlLabel()
  - makeGridColumn()
  - makeGridRow()
  - getBrowserIcon()
  - getUrlEditor()
  - getUrlField()
  - getUrlLabel()
  - getUrl()
  - isUrlEditLock()
